Overview

Best Value Management, LLC (BVM) was founded in 2013 by Brenda Campbell, a second-generation roofing and construction expert with over 30 years of experience. BVM has become an expert in the Federal Construction with extensive Design-Build and Design-Bid-Build construction experience. BVM entered the 8(a) program in 2020.

Self-Performance

BVM's self-performance capabilities include roofing, framing, drywall, concrete, stucco, masonry, flooring, and painting. Our in-house teams are extensively trained in federal contract compliance, EM-385 and OSHA safety protocols, and industry best practices.

General Construction

BVM and its staff have years of experience in performing design/build, new construction, renovation, and interior build-out work for federal and commercial clients

- | | | |
|--------------------|------------|---------------------------------|
| • Design/Build | • Roofing | • Chillers and equipment |
| • Concrete | • Framing | • Marine Construction |
| • Masonry | • Drywall | • Switchgear and distribution |
| • Structural Steel | • Stucco | • Fire alarm and fire sprinkler |
| • Utilities | • Flooring | • Airfield projects |
| • Site Work | • Painting | • Hangar repairs |
| • Electrical | • HVAC | • Marine work |
| | | • Pipe lining |

BVM has a licensed professional engineer on staff.

Roofing Division

BVM has a full-service commercial roofing division, with experienced in-house crews that can handle new construction, re-roofs, and retrofits throughout the nation. BVM is partnered with all of the major, national roofing manufacturers, and can obtain the required 20 & 30 year NDL warranties that most federal agencies require. We deliver top-quality roofing systems with a focus on durability, energy efficiency, and cost effectiveness, backed by cutting-edge technology and industry leading materials. When it comes to excellence in federal and commercial roofing, no one does it better than BVM.

Design/Build

BVM possesses extensive expertise in Design/Build projects for federal clients. In addition to having a licensed professional engineer on staff, BVM collaborates with a network of highly qualified design partners experienced in federal design work. A few of our areas of specialization include roofing, fire alarm systems, fire suppression systems, architectural design, and electrical systems. BVM partners with a network of trusted experts, enabling us to provide comprehensive solutions for all aspects of design-build projects.

SBA Mentor-Protégé Program (SBAMPP)

BVM is currently participating in the SBA Mentor-Protégé Program (SBAMPP) with Milton J. Wood Company. Milton J. Wood Company, along with its sister company, Milton J Wood Fire Protection, is assisting BVM in expanding its capabilities and services in plumbing, HVAC, fire protection, fire alarm, and electrical systems. In addition to enhancing our technical capabilities, Milton J. Wood Company helps provide financial assistance through expanding our aggregate bonding capacity on our teaming projects.
